

Stray Animal Project

Annual Impact Report 2021

1222 Harrison St, Apt 4207, San Francisco, CA, USA, 94103 • strayanimalproject.org • strayanimalproject@gmail.com
Stray Animal Project is a 501(c)(3) nonprofit organization. Our Tax ID is 84-4801908

Dear friend,

The victories captured in this report demonstrate how the support of people like you has made a lasting difference in less fortunate animals' lives. And yet, we all know there is so much more work to be done. Thanks to our donors, partners, vets, and volunteers we were able to surpass our goal and neutered/spayed 5033 animals last year.

Just to think that in the last 2 years we got off the ground as a nonprofit and have already reached 6594 animals neutered/spayed to date is unbelievable. Your support played a big part in our success.

Together in 2022, we will accomplish our ambitious goal of neutering/spaying 7000 more animals.

With woofs and purrs of gratitude,

Karina Canales
CEO, Stray Animal Project

Highlights

5033

animals
neutered/spayed
during 2021.

965

pets fixed from
low-income
families.

+9000

people reached with
educational pet
ownership content.

6594

animals
neutered/spayed
to date!

143

neuter/spay
campaigns.

Received GuideStar
Platinum Seal of Transparency

Hi hooman!
We're Tahiti and Fiji,
the **6000th** and
6001th fixed
animals.

Long-term impact

+17,6M*

animals prevented from being born and
suffering on the streets in the next 7 years.

*These calculations can vary, we have considered the most conservative one "508 puppies and 4948 kittens can be born from an unsplayed female and her offspring in seven years" - SNAP (Spay Neuter Assistance Program Inc).

Expanded to Arequipa and Piura

Last year we were able to expand outside Lima and started operations in other coast region cities of Peru: AREQUIPA AND PIURA.

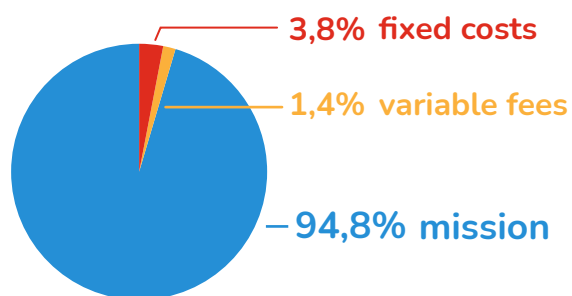

Expansion is important. Lima has ~30% of Peru's population and therefore a high concentration of stray animals, but that centralization is the reason that stray animals outside Lima barely receive any help.

In 2021 we were able to spay and neuter 380 and 273 animals in Arequipa and Piura, respectively, and this current year we want to expand even more and arrive in the Andes and Jungle of Peru.

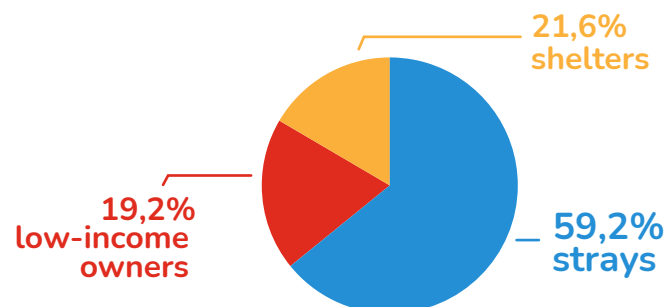

Efficiency as a core value to drive more impact

We're committed to maximizing the impact of your donations. That's why 100% of your donation goes directly to support our programs. Fixed costs and variable fees are covered by the Board Members.

Focus on the most vulnerable ones

We focus on animals that otherwise won't be fixed: animals from low-income families, shelters, and strays. During 2020, 33.3% of our benefited animals were strays, and in 2021 we almost doubled our rate of stray animals neutered/spayed.

Helping low-income pet owners

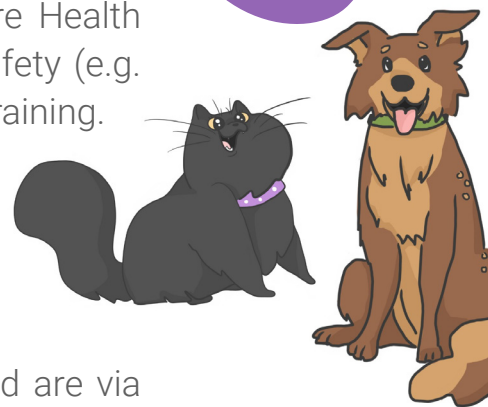

We love helping pet owners who care about their pets but are not able to afford spay/neuter surgeries costs at a veterinarian hospital. Their love for their pets force them to be creative. Usually they bring their animals on laundry baskets or boxes instead of a pet carrier.

Education is key

We launched an educational page in Spanish where a dog Firulais and a cat Bigotona are the ones teaching humans on how to be a responsible pet owner. Our content has reached +9K people in Peru. The pillars are Health (e.g. spaying, vaccination), Safety (e.g. microchip), Diet, Wellness & Training.

WE'RE HERE TO TEACH YOU HOW TO BE A GOOD PET OWNER

TNR campaign

Trap-Neuter-Release. Most of the stray animals we neutered/spayed are via TNR campaigns and one of our main focuses is feral cats due to their high reproduction rates. In 2021 we had 37 TNR campaigns and fixed 369 feral cats.
